

# THE XEROX DIFFERENCE

OUR COMMITMENT TO PROVIDING LEADING TECHNOLOGY

Count on us™

# xerox

Xerox technology; do more than just copy, print, and fax...achieve innovation, productivity, security, efficiency, and sustainability for your business with Xerox.

## Achieve Productivity

No more waiting at the printer for your job to print! Xerox "print around" feature enables you to literally print a job around one that may be held up due to an empty paper drawer.

How many times a day do you have to leave your desk to see if your job printed? Although, this may be good for your wellness goals, it's not so great for your productivity. Xerox print drivers allow you to see paper tray levels, toner levels, and active jobs right from your desk!

Scheduling three-hour maintenance service calls that disrupt your office is a thing of the past with Xerox! MOS offers Xerox Smartkits that allows the customer to replace wearable parts on the fly, maximizing uptime.

Search for words in your text-searchable PDF's with scanning as a standard option allowing you to quickly search for key words inside a scanned document. In addition, Xerox compression technology allows you to scan more documents at a time which reduces the chance of blocking your scanned document or bogging down your network due to size limitations.

Thanks to smartphones and tablets, working on the go has become business as usual. Xerox Mobile Print is a user-friendly app that can help your employees print anywhere at any time from their mobile devices.

## Achieve Security

When it comes to security, Xerox offers peace of mind like no other!

The Department of Defense wrote the criteria for Xerox security standards. Xerox devices are utilized in the Pentagon and on Air Force One! Any Xerox office product with a hard drive provides Image Overwrite as a standard option. In addition, Xerox offers a disk removal service, allowing you to have the hard drive removed when it comes time to trade in the unit. You can have worry-free printing with Xerox Secure Print. Your print jobs will not print until you're ready and will not release without your password authentication.

## Achieve Device Management

Your IT administrators are faced with the challenge of continuously managing a diverse fleet. They need a comprehensive, easy-to-use tool that does all that and more!

Xerox CentreWare Web gives you added productivity advantages you might not expect in a device management tool. This innovative, web browser-based software tool installs, configures, manages, monitors, and reports on networked printers and multi-function devices in your enterprise—regardless of the manufacturer...and it's free! Xerox CentreWare Web ensures security by centrally managing critical security device settings. Xerox CentreWare Web allows you to track print usage by user and group to facilitate usage policies.

## Achieve Sustainability

Xerox and MOS view sustainability not as a cost of doing business but a way of doing business.

Xerox designs their products to meet Energy Star requirements and continues to develop and implement innovative printing technology to reduce energy use. All products returned to Xerox that are designated as equipment waste are disassembled for recycling.

MOS is committed to providing our customers with the industry - leading technology along with local service and support. Together, we can help you keep your business running.

## A legacy of Partnership

Michigan Office Solutions (MOS) represents the best of both worlds when it comes to your business solutions—the national resources and strength of Xerox and the agility of locally managed services and support team. In 1957, MOS started as a small local company formed by William S. Reed and partners. Back then we were known as Commercial Equipment Company. In 1981, the WS Reed and Company was formed to provide its customers with office equipment through other manufacturers. We are fortunate to have some of the original Reed Family members as employees today.

With the support of our customers and employees, we established a national presence when we were acquired by Global Imaging Systems, Inc in 2002. Michigan Office Solutions was formed in 2007, encompassing W.S.Reed and Company employees and CEC employees. As we continued to grow, our footprint began to grow and we now support 8 locations across the state. In 2007, Xerox purchased our parent company, Global Imaging as a wholly-owned subsidiary. Backed by the power of Xerox, we are your local partner in office technology.

THIS BROCHURE WAS PRINTED ON THE XEROX VERSANT 80.
